

[illegible]

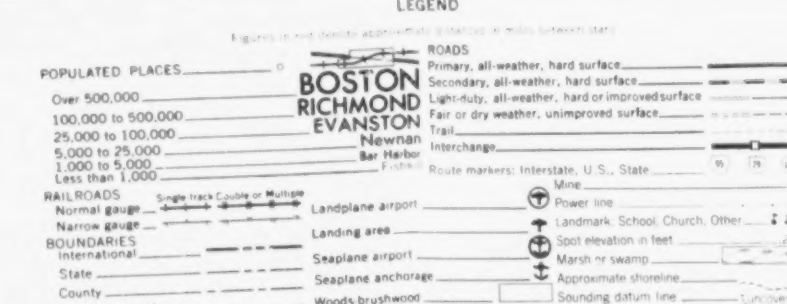

This is a detailed topographic map of the Gulf of Mexico coastline, spanning from Texas to Florida. The map is overlaid with a grid and includes various labels for land use, land cover, and management areas. Key features include:

- Geographic Labels:** MISSISSIPPI, GULF OF MEXICO, MOBILE, GULFPORT, BAYTOWN, and various state names like TEXAS, ALABAMA, and FLORIDA.
- Management Areas:** Several areas are designated as "NATIONAL FOREST AND BUREAU OF LAND MANAGEMENT" or "NATIONAL WILDLIFE MANAGEMENT AREA".
- Land Use and Land Cover:** The map uses various symbols and patterns to represent different types of land cover, such as forests, wetlands, and urban areas.
- Location Diagram:** A small inset map in the bottom right corner shows the location of the main map area within the Gulf of Mexico.
- Scale and Grid:** The map includes a scale bar at the bottom and a grid system for location reference.

The map is a technical drawing, likely a map of a specific region, showing various land use and land cover symbols. It includes a grid system and a scale bar. The map is oriented with North at the top. The title "LAND USE-LAND COVER SYMBOLS" is located at the bottom right. The map shows a large body of water, the Gulf of Mexico, and several landmasses, including Texas, Louisiana, Mississippi, Alabama, and Florida. The map is divided into several sections, each with its own set of symbols and labels. The symbols represent different types of land use and land cover, such as forests, wetlands, and urban areas. The labels provide additional information about the specific areas shown on the map. The grid system allows for precise location finding. The scale bar indicates the distance between points on the map. The orientation is clearly marked with North at the top.
